I'm a full-stack web engineer with leadership skills and more than 5 years of relevant experience.

I have a broad knowledge of web technologies and I thrive on breaking down projects and considering what technical stacks might be the best fit. I am adept at explaining those technical choices & constraints to an internal or external non-technical audience.

I hold an MS in Computer Science from Epitech (Paris, France) and attended California State U., Long Beach (USA).

Experience

W&Cie Agency (HAVAS Group), Lead Engineer, Web

March 2012 – present

Technical lead on web & mobile project of the agency. I choose technologies and write technical specs, I do quality control and I am the technical entry point of the agency for clients and partners. I manage an internal team of 3 developers and I myself also develop a number of web apps & REST APIs. Moreover, I do server administration and deployment of production-ready applications.

Renault Colin (Renault franchise), Web Engineer

September 2011 – February 2012

Working on specifications for <http://epicar.com> and an intranet. Main technical advisor on both projects: choice of technologies, database modeling, and technical documentation. Backend development on both sites and APIs to sync them using the Symfony2 PHP framework and the Doctrine 2 ORM.

Avenir Consult Competition, Web Application Engineer

April 2010 – December 2010

Design and development of tools specially tuned to the company's needs and demands, including an email scraper and a scheduling app.

Development using LAMP and the Zend Framework.

IAL, Part-time Software Engineer – Web

September 2009 – April 2010

Backend development of various web applications and services. Use of symfony1.4 and Zend frameworks.

Skills

- Expertise in backend development using PHP, frameworks, CMS & object-oriented patterns.
- Highly proficient in javascript (server and client-side), HTML (jade) & CSS (SASS).
- At ease with Python & Ruby (scraping, scripting).
- Regular use of usual RDBMS & MongoDB.
- Fully competent at Debian sys. admin.
- Broad awareness & understanding of web technologies, their pros & cons. Able to wisely choose a tech stack to match a specific need.
- Ability to present/defend a technical subject to an external or internal audience.
- Accustomed to interact frequently with clients and other business units internally.

Languages

Fluent in English & French.

Others

- Fast-learner, never afraid to pick up something new; quite the opposite.
- Extreme sports: skydiving, scuba diving. Others: squash.
- Wine connoisseur. I like my white the way I like my code – DRY.
