I'm a full-stack web engineer with leadership skills and more than 5 years of relevant experience.

I have a deep knowledge of server-side architectures and I am adept at bringing to life envisioned technical designs. I thrive on breaking down projects and considering what technical stacks might be the best fit.

I hold an MS in Computer Science from Epitech (Paris, France) and California State U., Long Beach (USA).

Experience

W&Cie Agency (HAVAS Group), Lead Engineer, Web
March 2012 – present
I choose technologies and write technical specs, I do quality control and I am the technical entry point of the agency for clients and partners. I manage an internal team of 3 developers and I myself also develop a number of web apps & REST APIs. Moreover, I do server administration and deployment of production-ready applications.

Renault Colin (Renault franchise), Web Engineer
September 2011 – February 2012
Working on specifications for http://epicar.com and an intranet. Main technical advisor on both projects: choice of technologies, database modeling, server configuration, technical documentation. Backend development on both sites and APIs to sync them using the Symfony2 PHP framework and Doctrine 2 ORM.

Avenir Consult Competition, Web Application Engineer
April 2010 – December 2010
Design and development of an intranet specially tuned to the company's needs and demands. Working closely with sales representative to get the

application as close as possible to their needs. Development using LAMP and the Zend Framework.

IAL, Part-time Software Engineer — Web
September 2009 – April 2010
Development of various web applications and services. Use of Elgg, symfony1.4 and Zend frameworks. Working three days a week in combination with third-year classes.

Skills

- Expertise in backend development using PHP, frameworks, CMS, & object-oriented patterns.
- Highly proficient in javascript (server and client-side), HTML (jade) & CSS (SASS).
- At ease with Python & Ruby (scraping, scripting).
- Regular use of usual RDBMS & MongoDB.
- Debian sys. admin.

- Broad awareness & understanding of web technologies, their pros & cons. Able to wisely choose a tech stack to match a specific need.

- Ability to present/defend a technical subject to an external or internal audience.
- Accustomed to interact frequently with clients and other business units internally.

Languages

Fluent in English & French.

Others

- Fast-learner, never afraid to pick up something new; quite the opposite.
- Extreme sports: skydiving, scuba diving. Others: squash.
- Wine connoisseur. I like my white the way I like my code – DRY.
